Trade Partner Profile

Switzerland		Trade Partner Rank: 1						
<p>The Swiss Confederation, operates similarly to a federal republic, and consists of 26 independent cantons. Each canton has its own constitution, and its own parliament, government and courts. Located in Central Europe—bordering Austria, France, Italy, Liechtenstein and Germany—it is approximately the size of New Hampshire and Vermont combined. Its capital is Bern and the official language is German. The country is home to 7.8 million people.</p> <p>Switzerland is not a member of the European Union, but has taken steps to mitigate trade challenges by adopting many of the EU's guidelines. Chemicals, health and pharmaceutical, measuring instruments, musical instruments, real estate, banking and insurance, tourism, and international organizations are important industries in Switzerland. The largest exported goods are chemicals (34% of exported goods), machines/electronics (20.9%), and precision instruments/watches (16.9%). Exported services amount to a third of exported goods.</p> <p>The country has an overwhelmingly private sector economy and low tax rates by Western standards; overall taxation is one of the smallest of developed countries. It is easy to understand why Switzerland is home to multinational corporations such as: Glencore, Nestlé, Novartis, Hoffmann-La Roche, ABB and Adecco. Also notable are UBS AG, Zurich Financial Services, Credit Suisse, Swiss Re, and The Swatch Group.</p>

Renewables:	<p>Historically, Switzerland's most important source of renewable energy has been hydropower. But the "new" renewables including solar, wood, biomass, wind, geothermal and ambient heat also play an increasingly important role in today's Swiss energy mix. It is clear that, primarily for economic reasons, it will only be possible to fully utilize the major potentials of photovoltaics or geothermal energy in approximately 20 years time. With the introduction of remuneration at cost for input into the grid, one of the goals of Switzerland's energy policy is to increase the proportion of electricity produced from renewable energy by 5,400 GWh, or 10% of the country's present-day electricity consumption, by 2030.</p> <p>Approximately 55.6% of Switzerland's overall electricity production comes from renewable sources, with hydropower as by far the biggest contributor (96.5%). 380 electricity supply companies now offer certified electricity products from renewable energy, which meet 4.5% of Switzerland's electricity demand.</p> <p>"New" forms of renewable energy currently contribute around 5.7% towards Switzerland's electricity production today. The biggest share (3.72%) comes from biomass (wood and biogas), followed by use of ambient heat (0.79%) and waste from incineration plants (0.47%). Smaller contributions come from solar energy (0.13%) and wind energy (0.004%).</p>
U.S. Embassy in Switzerland	Embassy Location: Sulgeneckstrasse 19, CH-3007 Bern Mailing Address: Use embassy street address. Telephone: [41] (031) 357 70 11 Fax: [41] (031) 357 73 44
